

MRS. GREVES SLEPT AT HEADQUARTERS.

Newark's Missing Woman
and Her Son Taken There
the Day She Disappeared.

Found on the Street Acting
Queerly and Complained of
Trouble with Her Head.

Discharged from the Station-House
Without a Record Having Been
Made of Her Arrest.

CLEWS FURNISHED BY THE JOURNAL.

She and the Child Were Last Seen in Mul-
berry Street, Newark, After She
Had Left Mrs. Ward's
House.

The Journal to-day is able to furnish the first clues to the whereabouts of Mrs. Belle Greves, of Newark, and her five-year-old son "Joe," who mysteriously dropped out of sight on July 16. The police of Newark have been asked to aid in the search, but apparently have not exerted themselves to any great extent. It seems almost incredible that Mrs. Greves and her child should have walked the streets without discovery since the alarm was sent out, and, even more so, that she should have previously spent a night in police headquarters without any record having been kept of her case. But such are the facts.

She was seen within a few blocks of the William Street Station as late as Wednesday afternoon last, but since that time all trace of her is lost. Mrs. Greves has been a sufferer from head trouble, and she is probably now laboring under some acute mental complaint. This is, the only plausible explanation of her conduct, as her home life was happy, and there is no reason why she should have deserted her husband.

On the evening she disappeared she had just terminated a visit to her sister, Mrs. Mary Sill, of Orange, and was on her way to join her husband, who had only recently begun work as an expert engineer at Upper Montclair. She boarded a Bloomsfield car at Scotland street and Tremont avenue, Orange. She was in the best of spirits, and her last words as she parted from her sister were those of a woman who is about to follow her disappearance the most diligent inquiry among the employees and officers of the trolley road failed to develop any fact that would throw light upon the mystery.

The Journal, however, has discovered that she had hardly completed half of the journey to Bloomsfield when her head began to trouble her. She was not quite familiar with the route to Upper Montclair, and she ultimately concluded to return to the home of her mother-in-law at Newark. She got out of the car and caught another going in the direction of the city.

MRS. BELLE GREVES, HUSBAND AND SON.

ENDED HIS LIFE BY CUTTING HIS THROAT.

Webster Gray, a Detroit Mason,
Committed Suicide in the
Grand Union.

Had the Razor with Which He
Did the Deed Under
His Pillow.

LETTERS FOR A SISTER AND FRIEND.

Had Been Drinking, and Sent a Note,
the Contents of Which Will
Be Known to
the Coroner.

Webster Gray, a thirty-second degree Mason and a noble of the Mystic Shrine, committed suicide at the Grand Union Hotel yesterday by cutting his throat with a razor.

The suicide's home was at No. 802 Trumbull avenue, Detroit, Mich., where he lived with a married sister. He was unmarried and about forty-five years old. He had been a guest of the Grand Union Hotel since July 23. For a week he had been drinking heavily, and, in consequence, had been requested by the hotel people to leave.

Matthew J. Fogarty, woolen merchant, at No. 33 Green street, was a friend of Gray. Gray's father was a prosperous merchant sailor, and left his son a fortune. Gray himself conducted a tailoring business for some time, but retired several years ago. Mr. Fogarty was well acquainted with the father, and on last Wednesday visited Gray at the Grand Union Hotel. Mr. Fogarty noticed that Gray had been drinking. On Friday afternoon Gray sent a letter by a messenger to Mr. Fogarty, but it was not received until yesterday morning.

The letter contained a request that Mr. Fogarty should call upon Gray at the hotel on Friday night. Mr. Fogarty made the call between 1 and 2 o'clock yesterday afternoon. One of the porters took his message to Gray's room, but got no response to his knock. The door was tried and found to be locked. A step-ladder was placed in position and a hallway looked through the transom.

Gray was lying on the bed undressed, with his throat cut. Hotel Superintendent Todd called in Patrolman Howard, who took charge of the body until Coroner's Physician Weston arrived, when a permit was granted for the removal of the body to an undertaker's on Fourth avenue.

The razor with which he had killed himself was found in its case under the pillow on which the suicide's head rested. The police believe that after cutting his throat Gray put the razor back into its case and placed it there.

The hour at which the act was committed could only be guessed. Gray had apparently been dead for some time. He was seen alive on Friday night, when he was refused a drink at the hotel.

The only motive for the suicide that can be imagined is despondency, after prolonged drinking. It would also seem that he took to heart Mr. Fogarty's failure to call on Friday night, for he did not know that the note he sent had not been delivered promptly.

Gray left two letters sealed and addressed. One was to his married sister in Detroit and the other to Mr. Fogarty. Dr. Weston decided that he had no right to open the letters, so he mailed them late yesterday afternoon. Mr. Fogarty had not received his letter last night.

The suicide's effects consist of two trunks and two handbags, containing clothing, some business letters, a gold watch and chain, a few coins and some odds and ends of articles. There was nothing among the effects to explain his act.

APPLES FIT FOR A QUEEN.

Victoria Likes the New
York State So Well
She Buys Many
Barrels Yearly.

Queen Victoria eats apples plucked from trees that grow in Western New York. She procures her regular supply of winter eating apples in the United States, and this is as little known as the fact that she possesses real estate on Broadway, New York City.

Readers of "Lorna Doone" and other works of fiction portraying rural England are apt to gain the impression that, if there is any one product of the earth of which England produces particularly fine specimens, it is the apple—big, round, red, juicy apples, too, such as Mr. Blackmore has described time and again. It appears, however, that such descriptions are literal fictions, else why should it have happened that more than ten years ago Queen Victoria, who is very fond of uncooked apples, and who found that just the kind she wanted could not be grown in her own realm, gave an order for the shipment of Windsor of many barrels of a certain brand of eating apples grown in Western New York?

It was in the Autumn of 1886 that Lady Randolph Churchill sent the Queen a barrel of Spitzenberg eating apples, grown in an orchard in Niagara County, New York. The present pleasure of the Queen immensely, and inspired her with an appreciation of the American apple which, through her, has spread among the highest class of English people, so that thousands of barrels of high-grade New York State eating apples are sent to Great Britain every year.

A firm of forwarding agents, whose offices are in State street, have had Queen Victoria's apple order ever since Lady Churchill's barrel started her to purchasing her apples in the States. This firm sends to Windsor every Autumn—generally in the month of November—ten half-barrels, each containing two bushels, of the small, compact, green-skinned, tart-flavored Spitzenberg apples, the product of a carefully cultivated orchard in Niagara County, this State.

The selection of these apples is personally attended to by one of the members of the firm, who says that out of every 100 apples picked over an average of 70 are rejected. For these apples the Queen pays, not counting commissions, cost of transportation, etc., from \$10 to \$15 a half barrel.

The apples are highly polished and carefully wrapped in var-colored tissue paper before being packed in the barrels. The barrels themselves are painted in parallel stripes of red and green, and glossily varnished, while around and inside the top of the barrels apple blossoms and leaves, and clusters of apples are realistically painted. On the head of each barrel is stencilled the address: "To the Under Steward of the House, Windsor Castle, England."

"Her Majesty is exceedingly critical as to these apples," said a member of the firm, "and in years that the quality of the apples has fallen below the standard, we have had news of it from Windsor."

"Apples alone, however," continued this speaker, "are not the only American edibles which we send to the Queen. Every year we receive from one of her secretaries numerous orders for large quantities of Blue Point oysters, for which the Queen has a great liking, and, during the season for them, we also send to Windsor many boxes of the seedless navel oranges of California."

bles which we send to the Queen. Every year we receive from one of her secretaries numerous orders for large quantities of Blue Point oysters, for which the Queen has a great liking, and, during the season for them, we also send to Windsor many boxes of the seedless navel oranges of California."

DIED SUDDENLY ON A YACHT.
Mrs. Widener, of Philadelphia, Succumbs to an Attack of Heart Disease.

Bar Harbor, Me., Aug. 1.—Mrs. P. A. B. Widener, of Philadelphia, died suddenly last night on her husband's yacht, Josephine, then lying in the harbor here. Death was due to heart disease.

Mrs. Widener, her husband and a party of friends, had been on the yacht for about a week, cruising along the Maine coast, and came here yesterday. Mrs. Widener had not been well for some time, but no danger was apprehended. She retired last night, not feeling unusually unwell, and when her husband went to call her this morning he found her dead, she having passed away several hours before. The yacht sailed this afternoon for New York, from which point Mrs. Widener's body will be sent to Philadelphia by rail.

To Sue for Children's Deaths.
H. Schmidt, owner of the German steamship Hermann, will probably be sued for damages by the parents of Joseph Lerner and David Milrod, two immigrants, who, with ten more, lost their lives aboard the steamer on January 2 last, by suffocation in the hold of the boat.

Morris Lerner and Levi Milrod, the fathers of the young men, who reside in New York, have phoned the American Consul at Flensburg, Germany, asking him to investigate the deaths on the Hermann.

Knight of old—crusaders who went to conquer the world, could not hope to succeed unless they were in virile, hearty health. A man cannot face difficulties if his stomach isn't in good order. Disordered digestion will make a sluggish, coward out of any man. It makes him mind stagnant, and he cannot think quickly enough to accomplish anything. It makes his movements slow and takes away the snap out of him. Every man in business in America has a fight on his hands just as much as ever had Belshazzar. It is a matter of life and death just the same with him as it was with the crusader. Indigestion and all the ills that go with it, most frequently start in constipation. That keeps all sorts of impurities in the body, forces them into the blood, and so deranges the whole system. Constipation is one of the commonest ills, and to it are traceable most of the disorders that make people sick. Once it gets a firm hold on a man, it is most difficult to overcome it. Temporary relief can be obtained in a thousand ways. There are medicines on the market that will help as long as you take them. There is only one remedy that is a real remedy—that you don't have to keep on taking forever. That is Dr. Pierce's Pleasant Pellets. The "Pellets" are tiny, sugar-coated granules, mild and efficient in their action. They effect a permanent cure. You don't become a slave to their use, as with other pills.

If you will send 21 one-cent stamps to cover cost of mailing only, we will send you FREE the most useful medical book extant. This is Dr. Pierce's Common Sense Medical Adviser, in plain English, a book of 600 pages, profusely illustrated, the greatest exposure of quackery ever made, and the best of 600,000 copies at the regular price of \$1.50 per copy. Address, World's Dispensary Medical Association, No. 664 Main Street, Buffalo, N. Y.

THE TREATMENT THAT CURES.

How Doctor Copeland's Wonderful Medication Does Its Beneficent Work for Suffering Humanity.

It Reaches, Soothes and Heals Every Part of the Mucous Membrane, Curing Invariably All Forms of Catarrhal Disease of the Nose, Throat, Vocal Cords, Bronchial Tubes, Lungs and Deafness—Doctor Copeland Gives His Famous Symptom Questions, Describing Disease in Its Different Forms, and Cites Instances of Notable Cures.

THE TREATMENT THAT CURES.

Doctor Copeland's new treatment, that has lifted the darkness and blight of the word "incurable" from hundreds of thousands of these cases of Catarrh in the Ears, Bronchial Tubes and Lungs, works its curative action for two reasons:

- (1) It reaches every sore spot, from the orifice of the nose to the deepest part of the lungs, to the innermost recesses of the middle ear.
- (2) Instead of irritating, inflaming and feeding the fires of the disease, it soothes, quiets, heals and cures.

What is this treatment that cures these conditions, once regarded incurable? The process does it restore the diseased membrane, remove the poison and relieve the soreness of disease. Let the experience of patients cured and being cured tell.

HOW IT CURES COMMON CATARRH.

Here is a patient taking treatment for Catarrh of the Head. He breathes the soothing medication through his nostrils, and the nasal channels open up, the stuffed-up feeling in the head leaves, and he can breathe naturally through the nose again. The dull pains across the front of the head fade away, and the nasal membrane is soothed until the inflammation and soreness are all gone. The bad odor of the breath passes away, and the loss of sense of smell returns. The dropping of the throat is checked, the nose does not stop up toward night any more, the sneezing and snuffing have ceased, and the discharge from the nose grows less and less, and finally stops altogether. The disease has been checked and eradicated from the system before it even reached his throat. It has not been driven down into his throat or into his lungs or into his ears, as so often is done by other treatments.

HOW IT CURES CATARRH IN THE THROAT.

Here is another patient who had Catarrh in the Head. He caught cold after cold, and the disease spread down into his throat. He breathes and drinks in the diseased condition of his head and throat. The soreness of the head and throat becomes less and the desire to eat and drink is disappearing. The sense of taste is returning and the voice again becomes soft and melodious. There is no more sneezing and snuffing in the morning. No longer does every exposure to the weather result in a stuffed-up throat that becomes sore and inflamed, and no longer does he find his throat sore as if he had been coughing and waking from an unrefreshing sleep.

HOW IT CURES CATARRH OF VOCAL CORDS.

Here is another patient who contracted Catarrh that extended from the throat into the glottis, the gateway that opens to the windpipe and lungs. The disease attacks the vocal cords, this sensitive instrument of the human voice, and soon mars its sweet tones or destroys them altogether. Here sits a lady inhaling the soothing preparation. She had been ten months silent, and the treatment has already restored her voice. Who can say what joy she feels in being restored to the usefulness and the pleasure of conversation?

HOW IT CURES CATARRHAL DEAFNESS.

Here is another patient who for years had been a sufferer. Every fresh cold seemed to stay longer and form a permanent focus of disease. His ears became stuffed up and his hearing became duller and duller, and there were ringing and buzzing noises in his ears. The Catarrh had passed downward and backward from the throat along the Eustachian tube leading from the throat into the ear. He had visited throat doctors and ear doctors and Catarrh doctors without relief. In this condition he was inhaling the never-failing medication, and soon he notices a change. The noises in the ears stop, there is no more ringing, the hearing gets better and finally the tubes of the ears open up and some thing seems to give way in his head. His hearing has completely returned. No wonder he considers the result a marvel.

HOW IT CURES BRONCHIAL CATARRH.

Here is another patient who was always sensitive to the weather. He contracted Catarrh of the Head, and it passed into his throat, the gateway that opens to the bronchial tubes. He coughed at night so that he could not sleep; there was pain behind his breast bone and under the shoulder blades. When he coughed he brought up a frothy, grayish material streaked with blood. He lost appetite and strength. He tried cough syrups and different medicines to no avail. He now breathes in with full inspirations the restoring and soothing medicine. The sore spots along the bronchial tubes heal, the cough ceases, the pain leaves. The appetite and strength return. He is again a well and happy man.

HOW IT CURES CATARRH OF THE LUNGS.

Here is another pitiful case. He had all the history of colds and catarrh, extending downward from the nose to the throat, to the glottis, to the bronchial tubes, and then into the small tubes of the lungs. His cough always troubled him. He raised large quantities of vile looking material, he had fever every afternoon and could not sleep at night. He had no appetite, and his strength and ambition failed. He had night sweats every once in awhile, and feared that his end was near.

See him after four months of treatment. A new man. The healing and soothing medication has time after time sought out every nook of the disease, even to the extreme depth of the lung cells, and bathed and cooled and healed the membrane. There is no more of the nasty discharges, no more cough, no more fever, no more pain, no more night sweats. The appetite returns, and with it comes back strength and ambition. The cheeks fill out and regain their color. The step becomes buoyant. He has been saved from a lingering but absolutely sure death.

THE PROPER COURSE FOR SUFFERERS.

The proper course for sufferers is this: Read these symptoms carefully, and mark those that apply to your case, and bring this with you to either of the Copeland offices. If you live away from the city, send by mail and ask for home treatment. In either instance, and whether by mail or office treatment, the patient may be assured of the speediest relief and cure possible to enlightened medicine.

SYMPTOMS OF CATARRH OF THE HEAD AND THROAT.

The head and throat become diseased from neglected colds causing Catarrh, which the condition of the blood predisposes to this condition.

Julius Munzenmaier, 92
St. Mark's Place, Brooklyn.
Cured of Catarrh of Head
and Throat.

- "Is the voice husky?"
- "Do you spit up slime?"
- "Do you ache all over?"
- "Do you snore at night?"
- "Do you blow out snobs?"
- "Is the nose stopped up?"
- "Does your nose discharge?"
- "Does the nose bleed easily?"
- "Is this worse towards night?"
- "Does the throat itch and burn?"
- "Is there pain in front of the head?"
- "Is there pain across the eyes?"
- "Is there tickling in the throat?"
- "Is your sense of smell leaving?"
- "Do you hawk to clear the throat?"
- "Is the throat dry in the morning?"
- "Do you feel miserable?"
- "Do you sleep with your mouth open?"
- "Does your nose stop up towards night?"

SYMPTOMS OF CATARRH OF THE BRONCHIAL TUBES.

This condition often results from colds extending from the head and throat, and, if left unchecked, extends down the windpipe into the bronchial tubes, and in time attacks the lungs.

Fred J. Hall, Bloom-
field, New Jersey. Cured
of Bronchial and Stomach
Troubles.

- "Have you a cough?"
- "Are you losing flesh?"
- "Do you cough up mucus?"
- "Have you a pain in side?"
- "Do you take cold easily?"
- "Is your appetite variable?"
- "Have you stitches in side?"
- "Do you cough until you gag?"
- "Do you raise frothy material?"
- "Do you cough on going to bed?"
- "Do you cough in the morning?"
- "Are you low-spirited at times?"
- "Do you spit up yellow matter?"
- "Is your cough short and hacking?"
- "Have you a disgust for fatty foods?"
- "Is there a tickling behind the palate?"
- "Do you feel you are growing weaker?"
- "Is there a burning in the throat?"
- "Have you a pain behind the breastbone?"
- "Do you cough worse night and morning?"
- "Do you try to spit up at night to get breath?"

SYMPTOMS OF CATARRH OF THE STOMACH.

This condition may result from several causes, but the usual cause is Catarrh of the Head, which drops down into the throat and being swallowed.

Mrs. Cecelia Olsen, Morris Plains, New Jersey.
Cured of Catarrh of the
Stomach and Bowels.

- "Is there nausea?"
- "Are you constipated?"
- "Is there vomiting?"
- "Do you belch up gas?"
- "Have you waterbrash?"
- "Are you light-headed?"
- "Is your tongue coated?"
- "Do you have a bad taste in the mouth?"
- "Is there pain after eating?"
- "Are you nervous and weak?"
- "Do you have sick headaches?"
- "When you get up suddenly are you dizzy?"
- "Is there disgust for breakfast?"
- "Have you distress after eating?"
- "Is your throat filled with slime?"
- "Do you at times have diarrhoea?"
- "Is there rush of blood to the head?"
- "Do you feel a burning in the bowels?"
- "Is there constant sensation in stomach?"
- "Do you feel as if you had lead in stomach?"
- "What stomach is empty do you feel faint?"
- "Do you belch material that burns throat?"
- "If stomach is full do you feel oppressed?"

THE SYMPTOMS OF EAR TROUBLES.

Deafness and ear troubles result from Catarrh passing along the Eustachian tube that leads from the throat to the ear.

Nathaniel Roe, 401 South
Second street, Brooklyn.
Totally deaf; can now hear
a whisper.

- "Is your hearing failing?"
- "Do your ears discharge?"
- "Do your ears itch and burn?"
- "Are the ears dry and scaly?"
- "Have you pain behind the ears?"
- "Is there a throbbing in the ears?"
- "Is there a buzzing sound heard?"
- "Do you have ringing in the ears?"
- "Are there crackling sounds heard?"
- "Is your hearing bad cloudy days?"
- "Are there sounds like steam escaping?"
- "Do your ears hurt when you blow your nose?"
- "Do you constantly hear noises in ears?"
- "Hear better some days than others?"
- "Do noises in your ears keep you awake?"
- "When you blow nose do the ears crack?"
- "Is hearing worse when you have a cold?"
- "Is roaring like a waterfall in the head?"

SYMPTOMS OF CATARRH OF THE LIVER.

This condition results from the liver being affected by Catarrh extending from the stomach into the tubes of the liver.

William McElwain, 344
Fourth street, Jersey City.
Totally deaf 12 years.
Hearing now perfect.

- "Are you irritable?"
- "Are you nervous?"
- "Do you get dizzy?"
- "Have you no energy?"
- "Do you have cold feet?"
- "Do you feel miserable?"
- "Is your memory poor?"
- "Do you get tired easily?"
- "Do you have heart flutter in stomach?"
- "Is your eyesight blurred?"
- "Have you pain in the back?"
- "Can't you explain where?"
- "Is your flesh soft and flabby?"
- "Are your spirits low at times?"
- "Is there a bloating after eating?"
- "Are you a pale yellow color?"
- "Do you have a gurgling in bowels?"
- "Do you have a rumbling in bowels?"
- "Is there throbbing in stomach?"
- "Do you have sense of heat in bowels?"
- "Do you suffer from pains in temples?"
- "Do you have palpitation of the heart?"
- "Do these feelings affect your memory?"
- "Is there a general feeling of lassitude?"

SYMPTOMS OF DISEASE OF THE NERVES.

The majority of nervous diseases are caused by poisons in the blood, poisons circulating in the blood that raises the brain and nerves, and such symptoms as these follow:

John O. Wendworth, 904
Eighth avenue, New York
City. Cured of Catarrh of
the Stomach and Nervous
Troubles.

- "Do you get giddy?"
- "Is your mind dull?"
- "Are you easily dazed?"
- "Do you have headache?"
- "Are you easily excited?"
- "Do your hands tremble?"
- "Does your heart flutter?"
- "Are you easily irritated?"
- "Are you always anxious?"
- "Is your temper irritable?"
- "Suffer from sleeplessness?"
- "Are you easily frightened?"
- "Does not sleep refresh you?"
